Professional Summary

Backend and cloud-focused software engineer with 5+ years of experience building and operating customer-facing platforms across AWS, Azure, and Kubernetes environments. Strong hands-on background in backend services, microservices, REST APIs, CI/CD automation, and production reliability, with experience leading delivery for high-traffic systems serving 100k+ daily users. Known for combining architecture-minded thinking with practical execution, clean code, and strong ownership in fast-paced enterprise environments.

Core Qualifications

- ? Backend engineering with Java, Node.js, TypeScript, Python, SQL, RESTful APIs, and microservices
- ? AWS delivery using Lambda, DynamoDB, S3, CodePipeline, and cloud-native integration patterns
- ? Scalable architecture, performance optimization, caching, resilience, and operational troubleshooting
- ? DevOps and platform practices including Docker, Kubernetes, Helm, Jenkins, Ansible, Git, and CI/CD
- ? Enterprise and customer-facing delivery with testing, code quality, peer collaboration, and production support

Professional Experience

Full Stack Developer

Purolator Inc | Mississauga, ON | Nov. 2023 - Present

- ? Led development of Purolator's high-traffic AI chatbot platform serving 100k+ daily users, sustaining 99.99% uptime through strong Kubernetes and Docker-based production engineering.
- ? Designed and implemented scalable, modular backend and frontend systems with an emphasis on clean architecture, unit testing, maintainability, and long-term delivery quality.
- ? Maintained and enhanced Purolator's largest tracking API in Java, improving availability and performance for a heavily used customer-facing platform.
- ? Built AWS-based microservices with Lambda and integrations across DynamoDB, CodePipeline, and S3 to support scalable service delivery.
- ? Reduced cloud infrastructure spend by more than \$10,000 per month by introducing Redis caching and improving backend performance under load.
- ? Automated CI/CD workflows to support faster, lower-risk releases and zero-downtime deployments.
- ? Improved system reliability and operational responsiveness through monitoring, logging, and production issue resolution.

Software Developer II

Cineplex Digital Media | London, ON (Remote) | May 2021 - Nov. 2023

- ? Built backend services in Node.js and TypeScript using Azure Functions to manage and troubleshoot thousands of distributed digital signage devices.
- ? Led a core platform migration from Azure Device Twins to MySQL, improving system responsiveness, scalability, and data access patterns.
- ? Developed internal full-stack operational tools and REST APIs used to support content management and device servicing workflows.
- ? Implemented CI/CD pipelines with Jenkins and Selenium to improve release consistency and automated test coverage.
- ? Deployed and managed containerized services with Helm and Ansible, contributing to more reliable operational delivery.

Full Stack Developer

TritonWear | Toronto, ON | Aug. 2020 - May 2021

- ? Rewrote core application components in TypeScript using MVVM principles to improve maintainability, quality, and team velocity.
- ? Applied test-driven development practices with Jest to strengthen unit coverage and reduce regression risk.
- ? Built scalable Node.js APIs and AWS-based microservices supporting athlete performance and analytics workflows.
- ? Delivered responsive product features across Angular and Ionic applications for a globally used connected-device platform.

Software Developer / Research Assistant

Inclusive Media and Design Centre (Ryerson University) | Toronto, ON | Sep. 2018 - May 2020

- ? Built NICKEL, a Flask-based web application used by researchers to assess accessibility in academic content.
- ? Developed a Java-based Android application integrated with IBM Watson APIs for media and health-related research workflows.
- ? Refactored a legacy codebase to improve performance by 50% and reduce storage usage.
- ? Designed secure databases for sensitive health information with attention to data protection requirements.

Education

Toronto Metropolitan University (formerly Ryerson University)

BSc (Hons), Computer Science | Toronto, ON | Sept. 2015 - May 2020

Technical Skills

Languages	Java, JavaScript, TypeScript, Python, SQL, Bash
Backend	Node.js, Express, Flask, REST APIs, microservices
Cloud & DevOps	AWS, Azure, Docker, Kubernetes, Helm, Jenkins, Ansible, Git, CodePipeline
Frontend	React, Angular, Ionic
Testing & Ops	Jest, Selenium, unit testing, CI/CD, monitoring, logging, production support
